

404600 to 404723—Continued**404607 and 404608—Continued**

404607. 201. National Institute of Agronomy, Caapucu. Plant with stolons 0.6 m high, dense foliage. Cultivated.

404608. 282. Ten km north of Route 7, 50 km west of Puente Presidente Strossner. Semidecumbent, leafy grass 0.6 m high. Produces few viable seed. Collected from Japanese cooperative. Cultivated.

404609. BRACHIARIA DECUMBENS Stapf**Surinam grass.**

202. National Institute of Agronomy, Caapucu. Stoloniferous, dense foliage. Cultivated.

404610. CANAVALIA ENSIFORMIS (L.) DC. Fabaceae.**Jackbean.**

210. National Institute of Agronomy, Caapucu. Viny plant with pods 15 to 20 cm long. Cultivated.

404611. CASSIA sp. Fabaceae.

293. Six km north on road to Hernandarias, 4 km west of Puente Presidente Strossner. Prostrate, viny plant 5.1 cm high. Yellow flowers, black pods 2.5 cm long. Wild.

404612. CENCHRUS MYOSUROIDES H.B.K. Poaceae.**Big sandbur.**

257. Near entrance to Estacion Experimental Ganadera. Erect, bunchgrass with inflorescence 1.06 m high. Very palatable to cattle. Wild.

404613. CHLORIS CASTILLONIANA Lillo & Parodi Poaceae.

258. Near entrance to Estacion Experimental Ganadera. Somewhat stemmy, erect bunchgrass 0.9 m high. Drought tolerant. Wild.

404614. CHLORIS DISTICHOPHYLLA Lag.

198. National Institute of Agronomy, Caapucu. Plant with inflorescence 1.06 m high. Foliage 38 cm high, thickened leaves. Ornamental species of the genus. Wild.

404615 and 404616. CHLORIS POLYDACTYLA (L.) Swartz

404615. 259. Near entrance to Estacion Experimental Ganadera. Stemmy bunchgrass with inflorescence 1.06 m high. Drought tolerant. Wild.

404616. 297. Six km north on road to Hernandarias, 4 km west of Puente Presidente Strossner. Erect bunchgrass with large inflorescence 1.06 m high. Leaves 0.6 m. Wild.

404617. CHLORIS sp.

213. On Route 12, 10 km northwest of Chaco-I. Wild.

404618. DESMODIUM TORTUOSUM (Sw.) DC. Fabaceae.**Beggarweed.**

276. On Route 7, 97 km west of Rio Parana. Erect, stemmy plant 0.9 m high. Large leaves and harsh, thickened foliage. Growing in heavily grazed area. Wild.

404619. DESMODIUM sp.

218. Three km north of Chaco-I. Wild.

404620. DESMODIUM sp.

219. Four km north of Chaco-I. Wild.

404621. DESMODIUM sp.

225. Twenty km south of Caapucu. Semiprostrate vine to 15 cm high. Wild.

404622. DESMODIUM sp.

239. Desarrollo Ganadero Estancia—"Barrerito", 18 km east of Caapucu. Erect plant 38 cm high. Growing in pasture at Station. Wild.
